

Mayur Rajendra Mane

Python / Django Developer — Software Engineer — Team Lead

Email: mayurmanerajendra@gmail.com Phone: +91 8766971289 LinkedIn: linkedin.com/in/mayur-mane-9b4838198

Professional Summary

Python/Django Developer with 2 years of experience in backend development, API engineering, deployments, and DevOps automation. Strong expertise in deploying Django applications using Gunicorn and NGINX, Docker-based packaging, CI/CD pipelines, and cloud environments. Proven leadership as a Team Lead handling international clients, delivering scalable software solutions, and ensuring high availability in production systems.

Experience

Truecue iEngineering India Pvt Ltd, Pune

Software Application Engineer / Team Lead

Jan 2024 – Present

- Led a cross-functional team delivering backend and integration solutions for 4 international clients (Fiji, Micronesia); promoted to Team Lead within 3 months.
- Designed, developed, and maintained Django-based REST APIs for IoT sensor data ingestion with authentication, pagination, and robust error handling.
- Packaged Django applications using Docker and deployed production services with Gunicorn (WSGI) and NGINX as reverse proxy and static/media server.
- Implemented systemd unit files and Ansible playbooks to automate deployments and environment updates.
- Configured Gunicorn workers, graceful reloads, and socket-based communication to improve uptime and reliability.
- Tuned NGINX for SSL termination (Let's Encrypt), gzip compression, caching headers, client limits, and static/media offloading.
- Implemented logging and log rotation; integrated application logs and metrics with Prometheus and Grafana.
- Built CI/CD pipelines using GitHub and Jenkins for automated testing, image builds, and rolling deployments.
- Integrated CARL EAM with ERP systems (QAD, SAP) using Django REST APIs and asynchronous background workers.
- Automated routine server operations, health-check endpoints, and uptime monitoring to ensure SLA compliance.

PHN Technologies, Pune

Machine Learning Intern

Jun 2023 – Sep 2023

- Built Python-based data preprocessing pipelines and trained ML models with reproducible experiments.
- Developed Django/Flask API prototypes to expose model inference endpoints for internal demonstrations.

Selected Projects

IoT Management System

Truecue iEngineering

- Backend built using Django, Django REST Framework, Celery, and PostgreSQL.
- Dockerized deployment using Gunicorn and NGINX with Jenkins and Ansible automation.
- Implemented SSL via Let's Encrypt with automated renewals.
- Added systemd services, socket activation, graceful restarts, and health-check endpoints.

ERP Integration with CARL

- Built Django-based middleware for transaction exchange between CARL and ERP systems.
- Implemented RESTful contracts with OAuth-based authentication.
- Deployed behind NGINX with rate limiting and IP allowlisting for security.

Automated CI/CD Pipeline

- Implemented Jenkins pipelines for unit tests, linting, Docker builds, and deployments.
- Used Ansible for zero-downtime Gunicorn restarts and environment configuration.

VM & Server Management

- Managed multiple applications on a single public IP using NGINX reverse proxy and subdomain routing.
- Hardened servers using UFW/firewalld, SSH key authentication, and fail2ban.

Key Skills

Backend & Frameworks: Python, Django, Django REST Framework, Celery, SQL (PostgreSQL, MySQL)
Deployment & DevOps: Gunicorn, NGINX, Docker, systemd, Ansible, Jenkins, Terraform, Kubernetes (basic), CI/CD
Cloud & Monitoring: Azure Cloud (IoT Hub), Prometheus, Grafana, logging and alerts
Integration & APIs: REST API design, OAuth, ERP integrations (SAP, QAD), MQTT
Frontend & Data: React (basic), Power BI, ETL, DAX
Tools: Git/GitHub, SSL/Let's Encrypt, load balancing, log rotation

Achievements

- Promoted to Team Lead within 3 months for fast delivery and leadership.
- Awarded **Team Lead of the Year** for leadership and project excellence.
- Delivered high-availability production systems for 4 international clients.

Education

Bachelor of Engineering (Computer Engineering)

Zeal College of Engineering and Research, Pune

2019 – 2023

Extracurricular & Volunteering

Active volunteer with **Love and Care Foundation** — supporting orphanage children and community programs.
